

Brandon Hann

Stockton, CA | (209) 689-4347 | b_hann@pacific.edu | github.com/Spook65

EDUCATION

University of the Pacific

Stockton, CA

Bachelor of Science in Computer Science | GPA: 3.91

Expected May 2027

Related Coursework: Discrete Math, Data Structures, Application Development, Web Applications, Design/Analysis of Algorithms, System Admin and Security, Computer Systems & Network

EXPERIENCE

AI Task Force – AI in Ethics, Privacy, and Compliance

Jan. 2026 – Present

University of the Pacific

Stockton, CA

- Researched ethical frameworks guiding institutional AI adoption with emphasis on accountability and human oversight.
- Analyzed data privacy, security risks, and regulatory implications of emerging AI technologies, helping inform ethical adoption guidelines and strengthen institutional awareness of compliance considerations.
- Designed and summarized student surveys capturing perspectives on AI use, transparency, and academic integrity onto a structured report that captured key trends and supported policy-focused recommendations.

Tedd and Chris Robb Garden

Jan. 2026 – Present

University of the Pacific – Garden Coordinator

Stockton, CA

- Demonstrated teamwork, time management, and operational reliability while supporting sustainable systems, resource distribution, and hands-on process execution.

Alpha Phi Omega – Professional Service Fraternity

Jan. 2026 – April 2026

University of the Pacific – Secretary (Executive Board)

Stockton, CA

- Applied organizational leadership, written communication, and systems management to streamline documentation, coordinated operations, and maintain structured workflows.

PROJECTS

CalHacks 12.0 Cura (AI Medical Voice Assistant) | Honorable Mention Winner (Regeneron)

Oct. 2025

- Developed a responsive front-end using React, TypeScript, HTML, and CSS, building core interfaces including dashboards, appointment views, and patient management systems.
- Built and integrated APIs using FastAPI and MongoDB, managing structured data, user interactions, and backend system workflows.
- Collaborated on an AI-driven system using Livekit (STT/TTS) and Chroma (vector DB) for voice-based symptom triage and intelligent response generation.
- Leveraged Creao AI to accelerate UI development and maintain consistent design patterns across components.

Mapetite – Food Discovery Web App

Oct. 2025 – Present

- Developed a responsive interface using TypeScript and JavaScript, emphasizing reusable UI components and scalable architecture.
- Implemented optimized search and category filtering logic, improving query efficiency and user navigation.
- Designed responsive layouts with a focus on UI/UX consistency and performance optimization.

ThreatGrid – Cybersecurity Intelligence Dashboard

April 2026 – Present

- Modeled a threat intelligence system using structured data objects and state management to represent categorized events, severity levels, and response workflows.
- Built a dynamic analysis panel using React-style component architecture to generate attack breakdowns, affected systems, and mitigation steps based on user interaction.
- Implemented an event-driven architecture with real-time state updates to handle user input, visual transitions, and workflow progression.

TECHNICAL SKILLS

Languages: C++, Java, TypeScript, Python

Frameworks & Tools: React, Node.js, FastAPI, Git, GitHub

Tools & Technologies: REST APIs, MongoDB, Three.js, Data Visualization

Concepts: AI Systems, Cybersecurity Fundamentals, Data Pipelines, UI/UX Design
