Education

University of the Pacific — Stockton, CA
Bachelor of Science in Computer Science | GPA: 3.86 — *Expected May 2027*

Experience

AI Fellow & Reviewer — Jul. 2026
Handshake AI — *Remote*
- Evaluated multi-hop research tasks designed to test frontier AI models, independently verifying answers across web and archival sources and identifying factual, reasoning, sourcing, and retrieval failures.
- Promoted from Fellow to Reviewer based on task quality; validated AI training data for prompt quality, source accuracy, and research-path correctness while providing actionable feedback on ambiguity, unsupported claims, and broken trajectories.

Summer Institute Student Assistant — May 2026 – Jun. 2026
University of the Pacific – Innovation Commons (The Cube) — *Stockton, CA*
- Provided technical support for a four-week Summer Institute by configuring classroom equipment, troubleshooting hardware/software issues, and assisting instructors and students during hands-on courses.
- Supported FAA TRUST, drone, and 3D printing instruction through flight operations, aerial photography, safety procedures, equipment setup, and hands-on technical assistance.

AI Task Force Research Assistant — Jan. 2026 – 2026
University of the Pacific – AI Ethics, Privacy, and Compliance — *Stockton, CA*
- Researched AI privacy, security, ethics, and regulatory considerations to support institutional discussions on responsible adoption, accountability, and human oversight.
- Designed and analyzed survey responses from 32 students, synthesizing trends in AI use, transparency, and academic integrity into a structured policy-focused report.

Secretary (Executive Board) — Jan. 2026 – Apr. 2026
Alpha Phi Omega – Professional Service Fraternity — *Stockton, CA*
- Managed chapter communications, calendars, meeting records, reservations, and shared documentation while maintaining structured operational workflows.

Projects

Mapetite – Food Discovery Web App | *React, TypeScript, Vite, Node.js, Express* — Oct. 2025 – Present
- Developed a full-stack restaurant discovery application using React, TypeScript, Vite, TanStack Router/Query, Zustand, Tailwind CSS, and Node.js/Express.
- Integrated geospatial restaurant data and implemented search, ranking, filtering, validation, and fallback logic to improve relevance and reliability across incomplete or inconsistent real-world data.

ODDWORKS – Multiplayer Roblox Game | *Luau, Roblox Studio, Rojo* — Aug. 2026 – Present
- Developing a multiplayer crafting and workshop game using modular Luau services for player state, plot assignment, salvage collection, crafting, and client-server state replication.
- Implemented server-authoritative validation, remote-event request handling, rate limiting, snapshot-based state replication, and rollback logic to reduce client trust and preserve consistent game state.

Cura – AI Medical Voice Assistant | *React, TypeScript, FastAPI, MongoDB, LiveKit, Chroma* — Oct. 2025
- Developed responsive patient and provider interfaces and integrated frontend components with REST APIs supporting dashboards, appointments, calendars, and patient workflows.
- Collaborated on a real-time AI voice system using LiveKit STT/TTS, OpenAI models, and Chroma vector search; team received a Regeneron Honorable Mention at CalHacks 12.0.

Technical Skills

Languages: Python, C++, Java, JavaScript, TypeScript
Frameworks & Tools: React, Node.js, Express, FastAPI, Vite, MongoDB, Git/GitHub, REST APIs
Technical Areas: Cybersecurity, AI/ML, AI Evaluation, Data Quality, Full-Stack Development, Research Verification, Debugging
